PROFESSIONAL SUMMARY

Full-Stack Engineer building for the web since 2019, the last few years full-stack with Next.js, React, TypeScript, Node.js, Prisma ORM and PostgreSQL, delivering production-ready digital products, business platforms, and data-driven applications. Strong across REST APIs, authentication and authorization, cloud deployment, and modern frontend architecture. Experienced in translating business requirements into maintainable software with a strong focus on security, scalability, performance, accessibility, SEO, and user experience. Product-minded approach spans discovery, system design, implementation, deployment, and continuous improvement.

CORE TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend: Next.js, React, Tailwind CSS, Redux Toolkit, responsive UI, component-driven development
Backend & Data: Node.js, Next.js server architecture, REST APIs, Prisma ORM, PostgreSQL, database design
Security & Identity: Authentication, authorization, RBAC, resource ownership policies, session security, API validation, audit/security logging
Cloud & Integrations: Vercel, Neon, Cloudinary, Resend, payment integrations, third-party APIs
Engineering: System design, clean architecture, performance optimization, accessibility, SEO, Git, GitHub

PROFESSIONAL EXPERIENCE

WordPress Developer, then Full-Stack Engineer (Employee) | Marvel Creative Media | Lagos, Nigeria | November 2019 - Present

- Design, develop, deploy, and maintain production web applications using Next.js, React, TypeScript, Node.js, Prisma ORM, and PostgreSQL.
- Build secure server-side APIs, authentication and authorization flows, database-backed workflows, administrative dashboards, and content-management capabilities.
- Architect reusable component systems and modular application structures that improve maintainability and support continued product growth.
- Integrate payment services, email infrastructure, cloud media storage, and third-party APIs while handling validation, error states, and operational workflows.
- Improve application performance, responsive behavior, accessibility, SEO, and Core Web Vitals across customer-facing products.
- Translate client and business requirements into technical solutions and manage delivery from architecture and implementation through deployment and ongoing improvement.
- Modernize legacy websites and applications into maintainable Next.js/TypeScript systems where appropriate.

WordPress Developer | Proxynet Communications Ltd | Lagos, Nigeria | June 2019 - November 2019

- Developed and maintained responsive CMS-powered business websites, customized themes and layouts, and integrated third-party services.
- Improved website usability, performance, cross-browser compatibility, and content-management workflows.

WordPress Developer | Elite Logistics and Development Ltd | Lekki, Lagos | January 2019 - June 2019

- Redesigned and maintained business websites, implemented responsive layouts across devices, and supported ongoing content and plugin management.
- Worked with stakeholders to improve navigation, visual consistency, and overall user experience.

SELECTED ENGINEERING PROJECTS

Rilaebu - Verified Housing Infrastructure Platform (Active Development)

Technologies: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, Resend

- Engineering a security-first housing platform designed around verified landlord-tenant workflows, transparent rental journeys, and trust/safety operations.
- Designed a modular-monolith architecture and domain roadmap spanning identity, properties, verification, listings, viewings, applications, agreements, payments, audit, security events, and administration.
- Built registration, sign-in, email verification, password-recovery and role-specific account experiences; further security lifecycle features remain part of the roadmap.
- Designed authorization around least privilege using role permissions, resource ownership, and state/policy checks rather than frontend-only access control.
- Specified audit, API and security-event logging requirements for sensitive operations as part of the platform security architecture.

MarvelMarts - Multi-Vendor E-commerce Platform

Technologies: Next.js, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, NextAuth, Redux Toolkit, Paystack, Cloudinary, Pusher, Resend

- Built and evolved a multi-vendor marketplace spanning customer, vendor, and administrative experiences with role-based access and protected dashboard workflows.
- Implemented product, order, wishlist, review, notification, vendor-management, and content workflows backed by reusable frontend state and database-driven services.
- Integrated Paystack wallet/payment flows with server-side verification and duplicate protection, alongside Cloudinary media, Resend email, and real-time capabilities.
- Strengthened authorization and API security across customer, vendor, and admin areas while improving mobile UX, SEO, and production reliability.

Marvel Creative Media Platform - Business & Digital Experience Platform

Technologies: Next.js, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, Neon, Resend, Cloudflare Turnstile

- Migrated the platform to a modern Next.js/TypeScript architecture with PostgreSQL/Prisma-backed administration and content workflows.
- Built CMS and blog capabilities, consultation and message pipelines, newsletter flows, email delivery, analytics interactions, and SEO-focused publishing features.
- Implemented form validation, origin checks, payload controls, sanitization, anti-bot protection, and reusable service-layer patterns for maintainable backend workflows.

ApexTraders - Trading Intelligence Platform

Technologies: React, TypeScript, Tailwind CSS, Redux Toolkit, Express.js, Prisma ORM, PostgreSQL, WebSocket

- Designed a modular trading platform architecture for real-time market data, trade execution, portfolio intelligence, trading history, analytics, and competitive leaderboard workflows.
- Planned and developed reusable frontend and data-layer foundations with PostgreSQL/Prisma persistence and WebSocket-oriented real-time market integration.

EDUCATION

Bachelor of Science in Entrepreneurship and Business Management
National Open University of Nigeria | Awarded 2026

CERTIFICATIONS & TRAINING

The Ultimate React Course - Udemy (2026) | Advanced React - Coursera (2023) | Advanced CSS and SASS - Udemy (2023) | JavaScript Application Programming - Alison (2022) | HTML, CSS & JavaScript for Developers - Coursera (2022)
